Dear delegates and experts,

The world desperately needs People-first infrastructure projects to 'Build Back Better' from the COVID-19 pandemic. In order to incentivise innovative thinking and creative ideas for 'Building Back Better', the UNECE has decided to hold at its PPP Forum 2021, a competition. By utilising the UNECE People-first PPP Evaluation Methodology for this purpose, the competition will also serve to help test its effectiveness and use. The following note sets out the main features of this competition.

The main features of the UNECE Building Back Better infrastructure award are as follows:

How to participate: Applicants can submit their project using the following [link](#).

Deadline: The deadline to submit projects is **31 March 2021**.

Winners: Different categories of awards will be given to the winners. Projects presented at UNECE Forums tend to receive high media attention nationally and internationally.

More details on the rules, terms and conditions of the competition can be found at the [UNECE 'Building Back Better' infrastructure award 2021](#) page.

Kind regards,

UNECE PPP Secretariat
Economic Cooperation and Trade Division
United Nations Economic Commission for Europe (UNECE)
